- NuVerus Energy uses a base of Aloe Vera for advanced absorption. Aloe Vera hydrates your body and reduces inflammation.
- NuVerus Energy is certified USDA Organic and contains no artificial preservatives or sweeteners and it tastes delicious.

The Power of Coffee Bean Caffeine in NuVerus Energy

Many of us now consume dangerous energy drinks on a daily basis. Why should we be concerned about this new variety of mental stimulant? The concern relates to where the buzz comes from: natural caffeine vs. laboratory produced synthetic caffeine in most energy drinks.

This majority of energy drinks are made with synthetic caffeine. Synthetic caffeine is much more potent. Synthetic caffeine is absorbed quickly by the body causing a hard jolt to your nervous system, with the inevitable crash. Continuous usage of synthetic caffeine tends to over saturate the nervous system which can lead to bigger problems.

Most energy drinks also contain high amounts of sugar, artificial sweeteners, as well as preservatives. In addition carbonated energy drinks leave the body in an acidic state, which is harmful to your teeth, digestive system, and vital organs.

NuVerus Energy uses natural Coffee Bean caffeine which is absorbed more slowly by the body. There are many advantages with this natural version of caffeine. The duration of the increased mental clarity will be longer, you get a prolonged feeling of alertness for many hours, and the effect eventually wears off gradually.

The use of SuperFoods and SuperJuices in NuVerus Energy, gives additional nutritional value. Other energy drinks cannot compare to the value of NuVerus Energy.
